

## Advisory Committee

### Advisory Committee

In the Department of Nursing we believe in a humanist and professional model.

Our teaching plan is designed to answer two important questions: what does society expect from nursing and what does the world of healthcare require from the profession? We are committed to a new teaching model that combines theory (reflective focus) and practice (active focus) to train nurses who want to change the world. To face the new challenges in the health service and the needs of our society, we not only work on nursing knowledge and skills but also on bolstering personal attitude.

This is why we work with a Committee of Experts comprising professionals from a variety of spheres and representatives from different fields of healthcare, to improve the creation of a professional teaching model of continuous training, adapted to the genuine needs of both the academic world and the workplace.

Our Committee of Experts includes:

- Ms Guadalupe Figueiras. Strategic Director of nursing at the Ministry of Health of the Generalitat de Catalunya
- Ms Candela Calle. General Manager of the ICO
- Ms Anna Cruz. Director of Nursing at the Universitary Hospital Sagrado Corazón
- Mr Jesús Esteve. Director of Nursing and the Hospital Moisès Broggi
- Mr Pedro Garzón. Director of Nursing and Therapies at the Parc Sanitari Pere Virgili
- Dr Xavier Mate. General Manager of Catalonia Hospitals in Quirón Salud
- Ms Carmen Díaz. Director of Nursing at the Corporació Sanitària Parc Taulí
